

THE WORLD IRON ORE MARKET

Major global iron ore<sup>1</sup> suppliers: 2018

<sup>1</sup> Dry million tonnes.  
Source: AME, Iron Ore Strategic Studies (Quarterly).

- Western Australia is the largest iron ore supplier in the world, accounting for 39% of global supply in 2018.
- Brazil is the second largest iron ore supplier in the world, accounting for 19% of global supply in 2018.
- China (10%), India (9%) and Russia (4%) are major global iron ore suppliers, but retain most of their production for domestic steel production.
- China's iron ore supply was steady at 204 million tonnes in 2018, following a small increase in 2017 and three successive years of decline between 2014 and 2016. China's iron ore supply peaked at 345 million tonnes in 2013.

China's iron ore<sup>1</sup> demand

<sup>1</sup> Dry million tonnes.  
Source: AME, Iron Ore Strategic Studies (Quarterly).

- China accounted for 59% of global iron ore demand in 2018, followed by India (7%), Japan (6%), Russia (4%) and South Korea (4%).
- China's iron ore demand rose 7% to 1,271 million tonnes in 2018.
- AME forecasts China's iron ore demand to fall gradually over the next 20 years to 1,071 million tonnes in 2038.
- India's iron ore demand is rising, but supply is mostly sourced domestically.
- Iron ore demand in Japan and South Korea is relatively stable.

Iron ore<sup>1</sup> and steel product<sup>2</sup> prices

<sup>1</sup> Annual average China spot price in nominal US dollars, cost and freight (CFR). <sup>2</sup> Annual average China steel product price index (2007-08 = 100.0).  
Source: World Bank, Commodity Markets; CEIC, China Premium Database; and <sup>3</sup> WA Government 2018-19 Mid-year Financial Projections Statement, December 2018.

- The rapid growth in China's iron ore demand led a rise in the iron ore price from US\$28 a tonne in 1999-00 to US\$173 a tonne in 2007-08, and averaged US\$129 a tonne from 2008-09 to 2013-14.
- The subsequent supply response, mainly from Western Australia, and a slowdown in China's demand, saw the iron ore price fall 42% in 2014-15 and 28% in 2015-16.
- The iron ore price rose 35% to US\$70 a tonne in 2016-17 as China's demand for higher-grade ore rose, but fell 0.2% to US\$70 a tonne in 2017-18. Steel product prices in China rose 27% in 2017-18.
- The iron ore price is forecast<sup>3</sup> to be US\$66 a tonne in 2018-19 and US\$62 a tonne in 2019-20.
- In January 2019, the iron ore price rose 10% to US\$76 a tonne and steel product prices fell 1%.

WESTERN AUSTRALIA'S COMPETITIVENESS

Estimated<sup>1</sup> iron ore resources

<sup>1</sup> Based on Western Australia's share of Australian iron ore production. <sup>2</sup> US Geological Survey. <sup>3</sup> Compound annual growth rate. Source: ABS 5204.0 Australian System of National Accounts.

- Western Australia has large iron ore reserves, accounting for 29% of the world's crude iron ore reserves in 2017.<sup>2</sup>
- Western Australia had an estimated 52 billion tonnes of economic demonstrated iron ore resource in 2017-18, which could sustain current production for 60 years.
- Western Australia's reserves had an average iron content of 48% in 2017, below the world average of 49% and Brazil's 52%.<sup>2</sup>
- Western Australia's iron ore production had an average iron content of 62% in 2017, below the world average of 63% and Brazil's 64%.<sup>2</sup>
- Western Australia's iron ore exploration expenditure fell 3% to \$274 million in 2017-18, compared with an annual decline<sup>3</sup> of 4% over the past ten years.

Total cash cost<sup>1</sup> of seaborne iron ore exports: 2018

<sup>1</sup> Price normalised total cash cost in US dollars, cost and freight (CFR), whereby production costs for different iron ore products are adjusted to a benchmark product (62% Fe fines) based on price differentials. Source: S&P Global Market Intelligence, Mine Economics Model.

- Western Australia's iron ore miners are among the world's lowest cost seaborne iron ore exporters.
- The average total cash cost<sup>1</sup> of Western Australia's iron ore exports was US\$31.5 a tonne in 2018, below the world average of US\$31.9 a tonne, although above Venezuela, Ukraine, Chile, Kazakhstan and Brazil.
- Western Australia's major iron ore ports are close to the largest iron ore markets in Asia, reducing shipping costs relative to some of its competitors.
- According to AME, Western Australia's average iron ore shipping spot rate to North China rose 14% to US\$7.6 a tonne in 2018, well below Brazil's rate of US\$18.5 a tonne.

Major iron ore export markets

(a) Included mainly India, Vietnam, Indonesia, Malaysia, Singapore and Hong Kong (SAR of China) in 2018. <sup>1</sup> Excludes China, Japan, South Korea and Taiwan. Source: ABS 5368.0 International Trade in Goods and Services.

- Western Australia's iron ore industry has established long-term trade relationships across Asia.
- Over 81% of Western Australia's iron ore exports went to China in 2018, with exports down 0.3% to 674 million tonnes – the first annual decline since 1999.
- Western Australia's iron ore exports to Japan, South Korea and Taiwan rose by a combined 1 million tonnes in 2018.
- Western Australia's iron ore exports to all other countries<sup>1</sup> rose by 13 million tonnes in 2018.
- In 2018, Western Australia accounted for over half of the iron ore imported by China (63%), Japan (51%) and South Korea (67%).

WESTERN AUSTRALIA'S SUPPLY

Iron ore sales volumes

<sup>1</sup> Compound annual growth rate. Source: WA Department of Mines, Industry Regulation and Safety, Resource Data Files; and <sup>2</sup> WA Government 2018-19 Mid-year Financial Projections Statement, December 2018.

- After years of strong growth, the growth in Western Australia's iron ore sales is slowing as recently completed projects ramp-up to full production.
- In 2017-18, Western Australia's iron ore sales rose 4% to 826 million tonnes, below annual average growth<sup>1</sup> of 11% over the past ten years. Iron ore sales were 291 million tonnes in 2007-08.
- Western Australia's annual iron ore sales are forecast<sup>2</sup> to rise to 847 million tonnes by 2021-22.
- Western Australia produced mainly iron ore fines (72%) in 2018, followed by lump (25%) and concentrate (3%).

Major iron ore miners' sales<sup>123</sup>

<sup>1</sup> Western Australian operations. <sup>2</sup> Wet tonnes. <sup>3</sup> Inclusive of third party tonnes. Source: Company production reports.

- Western Australia's major iron ore miners Rio Tinto, BHP and Fortescue Metals Group (FMG) are the largest global iron ore producers behind Vale from Brazil.
- Rio Tinto (360Mtpa) and BHP (290Mtpa) are currently increasing mine production to utilise additional rail and port capacity developed over recent years, and need to develop new mines by 2021 to sustain production or reach production targets.
- Rio Tinto's iron ore sales<sup>1</sup> rose 2% to 338Mt in 2018 and its sales guidance for 2019 is 338-350Mt.
- BHP's iron ore sales<sup>1</sup> rose 2% to 274Mt in 2018 and its production guidance for 2018-19 is 273-283Mt.
- FMG's iron ore sales<sup>1</sup> fell 0.5% to 168Mt in 2018 and its sales guidance for 2018-19 is 165-173Mt.

Major iron ore export ports

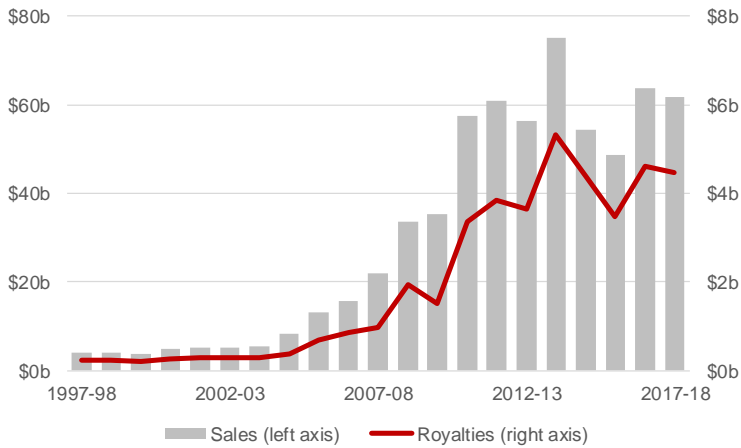

Source: ABS 5368.0 International Trade in Goods and Services.

- Port Hedland is the world's largest bulk export port, while Cape Lambert and Dampier are also major bulk export ports.
- Port Hedland (57%) exported most of Western Australia's iron ore in 2017-18, followed by Cape Lambert (22%), Dampier (16%) and other ports (5%).
- Port Hedland's iron ore exports rose 3% to 481Mt in 2017-18. Cape Lambert's iron ore exports rose 5% to 182Mt in 2017-18. Dampier's iron ore exports rose 8% to 134Mt in 2017-18.
- Rio Tinto expanded Cape Lambert and Dampier in 2015, raising annual capacity to 210Mt and 150Mt respectively. Annual shipping capacity in Port Hedland is planned to increase from 495Mt to 577Mt.

CONTRIBUTION TO WESTERN AUSTRALIA'S ECONOMY

Direct iron ore industry employment

Source: Western Australian Department of Mines, Industry Regulation and Safety, Resource Data Files.

- The iron ore industry is a large part of the Western Australian economy, accounting for 17% of gross state product and 57% of mining industry value added in 2017-18.
- In 2017-18, the value of iron ore accounted for 47% of Western Australia's merchandise exports and 54% of Western Australia's minerals and petroleum sales.
- The value of Western Australia's iron ore sales fell 3% to \$61.7 billion in 2017-18, below annual growth<sup>2</sup> of 11% over the past ten years.
- Iron ore accounted for 77% of Western Australia's royalties<sup>1</sup> in 2017-18 and 18% of Western Australia's government revenue in 2016-17.
- Iron ore royalties fell 3% to \$4.5 billion in 2017-18.

- In December 2018, Western Australia had \$12.5 billion of major iron ore projects under construction or committed and \$43.4 billion under consideration.
- Rio Tinto is ramping up the Nammuldi and Silvergrass mines, and is developing the Koodaideri deposit by 2021 to reach production of 360 million tonnes a year.
- BHP is ramping up the Jimblebar mine and is developing the South Flank deposit to replace Yandi mine production by 2021.
- FMG is developing the Eliwana deposit to replace Firetail mine production by 2020.

- Iron ore accounted for 48% of direct employment in Western Australia's minerals mining industry in 2017-18 (excluding exploration). Iron ore's share has risen from 29% of total minerals mining employment in 2007-08.
- Direct employment in Western Australia's iron ore industry rose 1.5% to 53,716 in 2017-18, the first annual increase since 2013-14.
- Iron ore industry direct employment reached 62,244 in 2013-14.
- Iron ore industry direct employment rose by 11% a year over the ten years to 2017-18.
