PORT HEDLAND DUST

I love PORT HEDLAND, I live here.

As the Minister your responsibility and conclusion has a huge affect of the outcome of our planning codes for the Port Hedland West End.

The West End is Port Hedland, visitors from all around Australia and our own state of Western Australia come to visit and associate with Port Hedland. Port Hedland needs planning codes to create population and commercial interests to create a vibrant town. We need R30 zoning with unrestricted conditions.

Lets populate the town and have a heart and soul for the region like its had through its history.

BHP have done a great job by removing the old crusher shed, however a small amount of dust still exists, with more good work I have no doubt they can get this under control and down to safe level.

This should be mining and industry's problem to come up the solutions to make it safe, not the residents, rate payers, workers the land owners, property developers , landlords, long time residents and new residents, YOU ARE OUR REPRESENTATIVE. YOU MUST PROTECT US.

CONTROL INDUSTRY, MIMIMSIE THE DUST AND GIVE US OUR UNRESTRICTED PLANNING CODES AND WE CAN CONTINUE TO ENJOY OUR COASTAL WATERFRONT.
